SUMMARY

I am a full-stack engineer combining engineering and leadership experience. I have spent years building software using a variety of tools and technologies.

EXPERIENCE

BambooHR

Senior Software Engineer Remote Sept 2022 - Present

- Acted as Scrum Master for a remote team
- Transitioned existing Total Rewards application from the Welcome platform

Welcome (acquired by BambooHR)

Senior Software Engineer Remote April 2021 - Sept 2022

- Developed core initial features, including Total Compensation and Compensation Scenarios
- Implemented Self-serve flow (including adding Google Authorization for sign-in) to allow customers to onboard themselves

Walmart Global Tech

Senior Software Engineer Portland, OR Dec 2020 - April 2021

Software Engineer III

March 2019 - Dec 2020

- Built the public-facing landing page used on desktop and mobile for the Walmart Credit Card initiative
- Re-architected application running on in-store order check-in devices to increase uptime and simplify deployments

BAM! (www.bam-lambda.com)

Co-Creator, Engineer Portland, OR Oct 2018 - Present

- Co-created a serverless framework using Node.js and Amazon Web Services (AWS), engineered to be at least 55% faster than similar applications

Doodles Academy

Board Member Portland, OR Dec 2015 - Dec 2020

- Served on the board of directors of this non-profit, dedicated to expanding access to high-quality arts education for children

Stumptown Coffee Roasters

General Manager of Retail, National Portland, OR Sept 2012 - Aug 2018

- Rebuilt management teams at each of ten cafes across the country and mentored each team in management tactics and systems deployment and opened new stores across the country
